PROJECTS

Home shapers 🔗
Interior designing website
Home Shapers is an interior design website built using Node.js and Next.js, offering a seamless user experience for clients seeking modern, personalized home décor solutions. The platform features a sleek, responsive design, allowing users to explore a portfolio of design projects, schedule consultations, and access a blog with design tips and trends.

School card 🔗
School managment website
A robust and efficient school management website built with NestJS and Next.js, leveraging PostgreSQL for database management. This platform facilitates seamless administration of school operations, offering functionalities such as student and teacher management, attendance tracking, grade reporting, and timetable scheduling. Its intuitive user interface ensures easy navigation for administrators, teachers, and students, while the backend ensures secure and scalable data handling.
